

SOUHAYLA ELMEFTAHI

DATA ENGINEER

Morocco,(+212)668546041 | souhaylaelmeftahi@gmail.com | souhaylaelmeftahi.netlify.app

SUMMARY

Final-year data engineering student with strong skills in data engineering and cloud technologies. Eager to contribute to oracle’s innovative projects while learning from industry experts during an end-of-year internship

PROFESSIONAL EXPERIENCE

- Internship Data Enginner, Brocolidata

Jul 2024 - Sep 2024

 - Developed a scalable data platform on GCP to streamline data management and analytics.
 - Implemented ETL pipelines, established data governance, built a data lake, and integrated FaaS with BigQuery and Looker Studio for advanced analytics.
 - Tools used : Google Cloud Platform (GCP), Docker, DuckDB, BigQuery, Cloud Scheduler, FaaS, Looker Studio.
- Internship Data Science, 3D SMART FACTORY

Jul 2024 - Aug 2024

 - Automate recruitment processes using NLP for improved candidate evaluation.
 - Developed a CV matching system, created a diverse question pool, implemented personalized question generation, and provided real-time feedback with adaptive testing.
 - Tools Used: Llama 3.1, NLP techniques, text similarity, semantic analysis.
- Internship Machine Learning Engineer , IT department at ENSAH

Jun 2023- Aug 2023

 - Analyze scientific articles on ResearchGate using machine learning techniques
 - Scraped web data with Selenium, applied neural networks for dimensionality reduction, and utilized unsupervised learning algorithms for clustering.
 - Tools Used: Selenium, Neural Networks, Pandas, NumPy, Matplotlib, Unsupervised Learning

PROJECTS

- Building a Comprehensive Data Lakehouse Architecture for Optimized Data Management

 - Architected a multi-layered system (Bronze, Silver, Gold) utilizing Minio for scalable storage, Apache Spark for data processing, Kafka for real-time data streaming, and various tools for advanced analytics and monitoring.
 - Tools Used: Airflow, Python, Java, Minio, Apache Spark, Kafka, KRaft, AWS Lambda, Elasticsearch, Slack, Cassandra.
- End-to-End Azure Cloud Migration and CI/CD Pipeline Implementation

 - Connected a local PostgreSQL database to Azure, built a data pipeline using Azure Data Factory and Databricks, developed interactive reports with Power BI, and established automated testing and deployment workflows with Azure DevOps.
 - Tools Used: SQL Server, Azure Data Factory, Data Lake, Synapse, Spark, Databricks, Power BI, Azure DevOps.
- Developing Ensah_Aviation: An Open-Source Patent Analysis Tool for Sustainable Aviation Fuel

 - Engineered a data pipeline with Bronze, Silver, and Gold layers using Spark for processing and transformations, automated workflows with Mage.ai, developed front-end features with HTML, CSS, and JavaScript, and designed interactive dashboards with Power BI.
 - Tools Used: Python, Selenium, Mage.ai, Snowflake, Spark, SVM, Power BI, HTML, CSS, JavaScript, Google Colab.

SKILLS

- **Programmation:** Python, SQL, Java, Shell/Bash Scripting.
- **Data Engineering & Cloud Platforms:** Azure, BigQuery, Hadoop Ecosystem, Apache Spark, Kafka, Airflow, Selenium, Mage.ai, Power BI, Looker Studio, dbt
- **Web Development & Tools:** HTML/CSS, Java EE, Spring, Docker, Git/GitHub, Linux, Windows
- **Leadership & Soft Skills :** Ownership , Curious, Think Big, Communication, Problem-Solving, Team Collaboration, Adaptability
- **Languages:** English, French, Arab.

EDUCATION

National School of Applied Sciences of AI- Hoceima	Sep 2020 - Jul 2025
• data engineering field	2022-2025
• Preparatory cycle: Sciences & Techniques for the Engineer	2020-2022

CERTIFICATIONS

- **Azure For Data Engineering (5 Certificates)**
Issued by Microsoft (via Coursera)
- **Machine Learning - Python**
Supervised & Unsupervised Learning
Issued by DeepLearning.AI, Stanford University (via Coursera)
- **Big Data - Hadoop Ecosystem Masterclass**
Issued by Udemy
- **Data Engineering/Science/Analytics (12 Certificates)**
Issued by DataCamp
